Activity name: Converting solid into liquid- sweet lime juice making activity

Class: Pre primary

Date: 30.08.22

Description: In a constantly changing environment, having life skills is an essential part of being able to meet the challenges of everyday life. Life skills provide children with important tools for development. Some of the simple day to day skills children learn, help imbibe lessons in patience, planning, self control, buying groceries, placing order for food, making juices and sandwiches. Students of class pre primary very actively participated in the juice making activity & enjoyed fresh sweet lime juice made by their own self. This activity also made them understand that how does a solid fruit can be converted into liquid when it becomes juice. This activity was a very good life skill example which will be used lifetime.
