

Activity name: BALANCING ROBOT

Class: V

Date: 22-7-22

Description:

" THE BEST WAY TO PREDICT THE FUTURE IS TO INVENT THE FUTURE " — ALAN KAY

Students of class 5 designed the robot using different materials like cardboard, ice cream sticks, waste materials, blocks and lego. Students tried to balance the robot using the science concept of centre of gravity. Students even spoke about robots, their advantages/disadvantages and the impact of robots on our lives in the coming years. Students enjoyed the activity and learnt the concept too.
