

# ASTRONOMY CLUB ACTIVITY REPORT

## Night Sky Observation

Space Explorers organized a Night Sky Observation workshop on 4th April 2023 for the classes 3 to 5 in the school premises. The workshop started with a PowerPoint Presentation in which they discussed different planets and their features, moon and its phases. Students observed the moon, Venus, and Mars with the help of a telescope.

Moon posters and booklets were handed over to the kids in the end. The workshop was very informative and interesting. Children enjoyed and learned about the moon.

## Glimpses of the workshop:

**TEACHER INCHARGE:**  
Ms. Sonia Jaitly  
Ms. Seema Yadav
