

SESSION - 2023 -24

Logbook for the month of April

Date	Description
28th April	<p>SORTING BEANS</p> <p>Sometimes kids don't want to play with the same toys which they have already played with numerous time. Finding something creative and new for them can be fun. Bean sorting is a very gentle and precise, little activity which helps developing problem solving, visual discrimination, and pincer grip , which will further help the kids to hold the pencil. This activity was done with in groups of two wherein accurately mixed beans bowls were given to the different groups and they were asked to sort the beans using only 2 fingers. Children really enjoyed this activity and also leant the art of team work.</p>
