

CLASS 5 - The Colloquy

Students were divided into groups and they had a 1min presentation on Natural Conservation - water/ energy/ soil. The presentation was supported by beautiful props like posters, planters, ppt's.

It was a very informative activity and the students learnt that the energy on Earth is not in unlimited supply. Furthermore, energy can take plenty of time to regenerate. This certainly makes it essential to conserve energy. Most noteworthy, energy conservation is achievable either by using energy more efficiently or by reducing the amount of service usage.
