

SESSION - 2023 -24

Date	Description
4th August	Water wise wizards
	<p>The water wise wizards activity at BBPS Manesar showcased the power of creative learning. By combining science education with hands-on artistic expression, the kindergarten students embarked on a journey of discovery that will leave a lasting impact on their understanding of the natural world. They were encouraged to paste clouds, sun, lake, river and rain drops to show the process of evaporation through water cycle. As the young artists proudly displayed their water cycle creations, it was clear that their artistic endeavours had not only enriched their minds but also enhanced their interest for both science and art.</p> <p>The water wise wizards activity at BBPS Manesar showcased the power of creative learning.
