**Activity name: Number display using seven segment display and arduino**

**Class: X**

**Date: November 07, 2023**

---

**DESCRIPTION:**

In this activity, numbers have been displayed using the digital seven-segment display and Arduino. Students have made the device with the help of a breadboard, and coding has been set up with the help of Arduino. The device was working perfectly by displaying the numbers in a regular pattern. A few glimpses have been shared below for reference.

**GLIMPSES:**
