

## SESSION - 2023 -24

Date	Description
11th December	<p>With an aim to instill environmental consciousness and foster creativity, BBPS Manesar embarked on a unique initiative where children participated in an engaging seed paper activity, transforming recycled materials into eco-friendly, plantable wonders. Under the guidance of their facilitator, the process involved blending discarded paper scraps, including old newspapers and seeds. Following the moulding phase, the seed paper sheets were delicately sieved to remove excess water forming beautiful shapes in moulds. These shapes were then carefully laid out to dry, ready to be shared and planted. The initiative aimed not only to teach the importance of sustainability but also to inspire young minds to think creatively.</p>
