## Activity- DELVING INTO DAIRY EXCELLENCE- STUDENTS' ENLIGHTENING VISIT TO AMUL FACTORY

Date-2May:2024

The heart of Amul lies in its dairy processing units, where milk is transformed into a range of products that grace countless homes across the nation. The Medical students of XI and XII embarked on a comprehensive tour through these units, witnessing first-hand the precision and dedication that go into every step of dairy processing. From milk collection to pasteurization, homogenization, and packaging, the students gained insights into the intricacies of dairy production.

The visit wasn't limited to observing processes; it was about engaging with industry professionals who shared their experiences and insights. Interactive sessions allowed the students to gain a deeper understanding of the challenges and opportunities in the dairy industry, providing a bridge between classroom learning and real-world application.
