

Inter house activity for the month of July

ARTICIAN

In this activity each team drew a portrait of any mathematician of their choice using mathematical techniques (e.g. use formulas to fill the portraits, use use threads to draw curves etc.). After completing their task one of the team members from each house came and explain about their project. The activity focused on the life and work of the Mathematician selected by them and highlighting their contributions in the field of mathematics and demonstrating how their mathematical skills have been applied to solve complex problems. The activity aimed to inspire students and faculty by illustrating the practical and theoretical impacts of mathematics.

Dr.Sachin Sethi a scientist by profession and a parent body came to judge the event.

Results

First position – Wisdom House

First position – Justice House

Second Position - Faith House

Third Position – Honour House
