XPERIA - 2024

Learning ignites the mind's endless potential

Learning through experience allows children to develop vital skills, such as language and communication with adults and peers. In the experiential learning process, children actively engage in posing questions, investigating, experimenting, satisfying their curiosity, solving problems, taking responsibility, being creative, and constructing meaning. This approach challenges them to take initiative, make decisions, and be accountable for their results. It helps them organize their thoughts and ideas to make sense of the world they live in.

At Bal Bharati Public School, Manesar, we encourage the students to perform acts of altruism, fostering friendliness, generosity, and consideration towards others to boost their self-esteem. We believe in creating an environment that strengthens and enhances our students' confidence, equipping them to excel in a rapidly changing, globalized world.
