

GAZING AT THE COSMOS.

The Astronomy Club students recently enjoyed an unforgettable trip to the Nehru Planetarium in Delhi, where they delved into the wonders of space. Their journey began with a captivating show on the Big Bang Theory, illustrating the universe's origins and its ongoing expansion. They then explored Galileo's contributions, learning about his groundbreaking observations, including the moons of Jupiter. The show concluded with a magical look at constellations like Orion, Ursa Major, and Taurus, blending myth with science. The breathtaking visuals of galaxies and stars left students in awe, inspiring a newfound curiosity and wonder for the cosmos.
