

## SESSION – 2024 -25

MONTH	Description
OCTOBER	<b>POLLUTION FREE DIWALI</b>
	<p><b>As winter approaches, smog pollution levels rise, with firecrackers significantly contributing to harmful air and noise pollution. These pollutants impact not only the environment but also vulnerable groups like animals, the elderly, and those with respiratory conditions. In a heartfelt effort to promote an eco-friendly Diwali, students from BBPS Manesar took to the streets, spreading awareness at New People Society and IMT Sector 1 Market with vibrant posters and powerful slogans. Their message is simple: let's come together to celebrate a cleaner, healthier Diwali. Our goal is to inspire positive change, not to offend. Let's honor tradition while embracing sustainability and make this Diwali a true celebration of joy, health, and harmony.</b></p>
