

Activity Name: Digital Dreams

Class : VI, VII, VIII, IX

Date: 26 Apr 2025

Description:

Students were tasked to dive into the world of digital art using Krita, a powerful open-source software. The session will guide the students through the tools and techniques that bring creative ideas to life. Students will explore digital painting, illustration, and animation with hands-on practice, tips, and tricks to enhance their skills.

Learning Outcomes :

🎨 **Mastering Digital Painting Tools:** Learn to install & download Krita Software. Students will gain proficiency in using Krita's diverse set of brushes, textures, and layers, enabling them to create detailed digital artwork from scratch.

🎨 **Enhancing Creativity and Technique:** Through guided exercises, students will learn how to apply advanced techniques such as blending, shading, and color theory to produce visually compelling designs.
