

## SESSION – 2024 -25

Month	Description
January	<b>CYBORG</b>
	<p>To design and create working models that promote cleanliness and sustainability in our city, the students of Classes 4 and 5 have taken a proactive role as responsible citizens. They have actively contributed to keeping our city clean and beautiful through their innovative ideas and teamwork. The project, Clean City Champions, highlights their creativity and dedication to a sustainable future. The students, representing all four houses, designed and created working models focusing on reducing waste volume, promoting recycling, and utilizing renewable resources. One of the key models presented was a Rainwater Harvesting System, which demonstrates the collection and storage of rainwater for non-potable purposes, helping to conserve water and reduce wastage.</p> <p>Through this initiative, the students not only showcased their innovative spirit but also raised awareness about the importance of cleanliness and environmental conservation. The Clean City Champions project is a testament to the ingenuity and commitment of Bal</p>

**Bharati students towards building a greener and cleaner future for all. This initiative reflects their understanding of sustainability and emphasizes the role young minds can play in solving real-world challenges. Their efforts inspire others to join hands in creating a cleaner and more sustainable city.**
