

# Bal Bharati PUBLIC SCHOOL M A N E S A R

## Description

The Astronomy Club participated in a remarkable broadcast featuring Indian astronaut Shubhanshu Shukla directly from the International Space Station (ISS). This unique event offered authentic insights into space missions and the daily experiences of astronauts, which fostered excitement and curiosity among the club members.

The session successfully bridged the gap between space and Earth, making the wonders of orbital science more accessible and engaging for the students. Inspired by this experience, many students were motivated to delve deeper into topics related to astronomy and space technology, fuelling their enthusiasm for upcoming science projects and club activities.

The broadcast also encouraged lively discussions and collaborative learning within the club, with members exchanging ideas and reflections on India's growing achievements in space. Overall, this event strengthened the club's collective passion for scientific discovery and exploration.
